Ajit Singh

MERN Stack Developer | Software Engineer

ajeetsinghghaghrpur@gmail.com | LinkedIn | GitHub | CodeChef | LeetCode | Portfolio

Profile

Full Stack Developer with hands-on internship experience at Aprilo Infotech, building responsive web applications using Next.js, React.js, and Tailwind CSS and integrating AI-powered chatbot functionality using OpenAI APIs. Developed ExceliQ, a full-stack analytics platform featuring interactive Three.js visualizations and Gemini API-driven insights, and ByteBlog, a blogging platform with secure authentication, RESTful APIs, and an admin dashboard. Skilled in MERN stack development, database management with MongoDB and Redis, cloud technologies including AWS, and Generative AI concepts such as Large Language Models (LLMs) and Retrieval-Augmented Generation (RAG). Solved 500+ data structures and algorithms problems on LeetCode.

Experience

Full Stack Developer Intern — **Aprilo Infotech**
Remote — *Apr 2026 – Sep 2026*

- Developed and enhanced responsive web interfaces using Next.js, React.js, and Tailwind CSS with reusable component-based architecture.
- Built and integrated AI-powered chatbot functionality using OpenAI APIs, connecting conversational UI with AI-driven business assistance.
- Integrated frontend components with RESTful APIs to support website functionality and AI-powered features.
- Implemented responsive layouts, interactive components, and UI improvements across desktop and mobile experiences.
- Used Git/GitHub for version control and contributed to debugging, feature development, and application improvements.

“‘latex

Skills

Languages :	C++, JavaScript (ES6+), TypeScript, Python
Frontend :	React.js, Next.js, Redux, Tailwind CSS, Responsive UI, Component-Based Architecture
Backend :	Node.js, Express.js, RESTful APIs, JWT Authentication, Role-Based Access Control
AI & GenAI :	Generative AI (GenAI), RAG (Retrieval-Augmented Generation), OpenAI API, Gemini API, LLM Integration
Databases :	MongoDB, SQL, Redis, Schema Design, Indexing
Cloud & DevOps :	AWS, Docker, CI/CD, Cloudinary
Tools :	Postman, Git, GitHub, VS Code, Vercel / Render, Jest
Core :	Data Structures & Algorithms, OOP, MVC Architecture, API Integration, Performance Optimization, Agile Methodology

Projects

ExceliQ — Demo Link

- Built a full-stack analytics platform for Excel/CSV uploads, data processing, and interactive visualization using React, Node.js, Express.js, and MongoDB.
- Integrated Three.js for interactive 2D/3D data visualizations and Gemini API for AI-powered dataset summaries and insights.
- Implemented JWT authentication with role-based access control and optimized APIs using pagination and database indexing.
- Integrated Cloudinary for cloud-based file storage and streamlined media handling.

ByteBlog — Demo Link

- Developed a full-stack blogging platform supporting blogs, comments, categories, user management, and RESTful CRUD operations.
- Built an admin dashboard for content moderation and user management with secure authentication and authorization.
- Optimized backend queries and integrated Cloudinary for secure image uploads and media delivery.

Technical Accomplishments

- Solved 500+ algorithmic problems on LeetCode.
- Solved 200+ data structure and algorithm problems on GeeksforGeeks.
- Achieved 2-star competitive programming rating on CodeChef.

Education

B.Tech in Information Technology — **CGPA: 8.1 / 10**
Bundelkhand Institute of Engineering & Technology (BIET), Jhansi — Nov 2022 – May 2026
