👤 PROFILE

Passionate full stack web developer with strong skills in React, JavaScript, Python, C++, and SQL, currently pursuing Bachelor of Technology. Experienced in building responsive web applications using modern tech like Tailwind, Next.js, and Node.js. Enthusiastic about AI, ML, and crafting efficient, impactful software solutions.

🎓 EDUCATION

2022 – present
Jhansi

Bachelor of Technology
Bundelkhand Institute of Engineering and Technology
Scored 8.59 SGPA

📁 PROJECTS

06/2025 – 07/2025

ExceliQ ✓

ExceliQ – Developed a robust full-stack web application over ~3 weeks (June–July 2025) using React, Node.js/Express, MongoDB, and Cloudinary. The platform features secure JWT-based authentication with role-based access (user/admin), Excel/CSV file uploads with cloud storage, and dynamic 2D/3D chart visualizations powered by Three.js. Integrated Gemini API for generating AI-driven data summaries. Additional functionalities include paginated upload history with view/download/delete options and a dedicated admin panel for managing users and files. Designed with a focus on responsive UI, clean architecture, and data security.

04/2025 – 04/2025

Notes App ✓

A React-based note-taking app built in **20 days** using **React**, **Tailwind CSS**, and **React Router**. Features include creating, viewing, and managing notes with unique IDs (UUID) and a clean, responsive UI.

05/2025 – 05/2025

Personal Portfolio Website ✓

A responsive portfolio website built in 5 days using HTML, CSS, and JavaScript. It showcases my skills, projects, and contact details with a clean layout and smooth navigation, offering visitors an engaging and professional browsing experience.

🧩 PROBLEM SOLVING

Leetcode ✓

Solved 100+ questions on leetcode.

Codechef ✓

2 star on codechef and solved 70+ questions.

GFG ✓

Solved 70+ question on GFG.
